

LINK Mail

LINKdotNET's comprehensive Messaging and Collaboration solution, besides giving high performance, allows different access methods including POP3, web access, RPC over HTTPS as well as Mobile access. It allows users to use the standard mail features including receive, send and store messages, search messages, sort them on various parameters, create folders, attach and send files, and maintain a personal address book.

It also provides collaboration features such as shared calendaring, shared documents, shared tasks, and shared contacts.

Using the RPC over HTTPS feature, you can connect to your mailbox and use all the collaboration features using Microsoft Outlook.

o Basic Plan:
